

Blood lead testing in Vermont

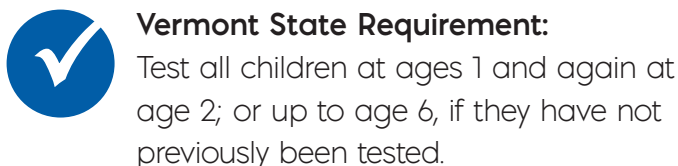

THE FACTS*

REIMBURSEMENT

BEST PRACTICES

Test pregnant and lactating women when one risk factor is present.

Is LeadCare® II right for your practice?

- Do you find patients don't comply with scripts for their lab lead tests?
- Does your staff waste time following up on tests, or get frustrated with slow turn around time?
- Do you already perform, or are you considering, fingerstick hemoglobin testing?
- Would an immediate result be helpful to your staff or appreciated by your patients?

If you answered 'YES' to just one of these questions, then LeadCare II could be a valuable tool for your practice.
